

# LBE series

## Defining Value ...

Standard Features

### Expanded Metal Basket

This feature is constructed conveniently in the A-Frame of the trailer. The basket is perfect for tie straps or tool storage.

### Rub Rails

The LBE comes standard with stake pockets and rub rails allowing easy tie down from all points of the trailer.

### Slide in Ramps

The ramps are stored beneath the trailer for easy, convenient storage. They are ribbed with 3" x 2" angle iron to provide strength and durability, yet are light enough to allow for easy maneuverability.

### Construction

The front beam (tire stop) is an 8" heavy duty steel channel with 5" steel channel main frame. 3" junior I-beam crossmembers complete the frame.
