

XR SERIES

Defining Value

Introducing the all new XR Series from RoyalCargo Trailers.

INDUSTRY LEADING FEATURES

Aluminum One Piece Roof: The one piece roof eliminates seams to ensure the cargo stays dry. The cross members are bowed in the center to enhance drainage and increase strength.

Checker Plate Rock Guard: A 20" high checker plate sheet, notched to fit the A-frame provides long lasting protection, and an attractive aluminum finish to the trailer.

V-Nose Front: The aerodynamic front end allows for smooth, easy towing.

Smooth Skinned Exterior: The smooth exterior provides an industry leading finish, while still maintaining wall strength and durability through the use of VHB (very high bond) tape.

VHB Tape: This tape creates a high strength flexible bond that allows the aluminum skin to expand and contract due to temperature fluctuation or travel wear, without damaging the aluminum, which increases the life of the trailer.
